TECHNICAL NOTE:

This publication contains quarterly employment and wage data for workers covered by New Mexico Unemployment Insurance (UI) laws (this includes all state and local government workers), and for federal government employees covered by the Unemployment Compensation for Federal Employees (UCFE). Employment data represents the number of workers on the payroll during the pay period including the 12th day of the month. This includes both full-time and part-time workers. Wages represent the gross amount of all payrolls for all pay periods paid within the quarter, regardless of the timing of the services performed. Commissions, bonuses, and overtime pay is included.

Approximately 97 percent of non-agricultural workers are covered under UI. Non-agricultural workers are covered when the employer has a total payroll for any calendar quarter of \$450 or more, or if there are one or more persons (part-time workers included) in employment in any part of the week in each of 20 weeks within a calendar year. Agricultural workers are covered when the employer has a total payroll for any calendar quarter of \$20,000 or more, or if there are ten or more persons (part-time workers included) in employment at any time in each of 20 weeks within a calendar year. Domestic workers are covered when the employer has a total payroll for any calendar quarter of \$1,000 or more.

Exclusions from UI coverage include, but are not limited to, independent insurance and real estate agents paid solely by commission, students in the employ of the school, college or university in which they are enrolled and regularly attending classes, and churches or church-sponsored organizations operated primarily for religious purposes.

In accordance with BLS policy, data reported under a promise of confidentiality are not published in an identifiable way and are used only for specified statistical purposes. BLS withholds the publication of UI-covered employment and wage data for any industry level when necessary to protect the identity of cooperating employers. Totals at the industry level for the States and the Nation include the undisclosed data suppressed within the detailed tables. However, these totals do not reveal the suppressed data. In the following tables, an asterisk is used to represent data that is not disclosed due to confidentiality.
