The U.S. Bureau of Economic Analysis (BEA) recently announced that New Mexico’s gross domestic product (GDP) in 2018 was nearly $92.6 billion, while the GDP for the United States was about $18.6 trillion. GDP measures the value of the goods and services produced in an area, less the value of the goods and services used up in production. It is an important economic indicator and used to measure an economy’s overall economic health. Visit www.bea.gov for more information on the GDP.

New Mexico Data Focus: Gross Domestic Product

Rachel Moskowitz, Bureau Chief
